Nothing Found

Your search for **+author:reddy +author:sreedhar** did not return any results.

You may want to try an Advanced Search for additional options.

Please review the Quick Tips below or for more information see the Search Tips.

Quick Tips

- Enter your search terms in lower case with a space between the terms.

      sales offices

  You can also enter a full question or concept in plain language.

      Where are the sales offices?

- Capitalize proper nouns to search for specific people, places, or products.

      John Colter, Netscape Navigator

- Enclose a phrase in double quotes to search for that exact phrase.

      "museum of natural history" "museum of modern art"

- Narrow your searches by using a **+** if a search term must appear on a page.

      museum +art

- Exclude pages by using a **−** if a search term must not appear on a page.

      museum -Paris

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

1   **System design and optimization: Java/CORBA technology on a Beowulf cluster** ▪

Liang Guo, Barrett R. Bryant, Robert M. Hyatt
April 2000 **Proceedings of the 38th annual on Southeast regional conference ACM-SE 38**
Publisher: ACM Press
Full text available: 📄 pdf(137.65 KB)   Additional Information: full citation, abstract, references

Java and CORBA have become standards for network and distributed systems programming over a wide variety of platforms[4]. As a kind of scientific and high performance computing machine, Beowulf is usually built out of commodity hardware components which are connected by a private high speed network, and runs on a free source code and modular design kernel software operating system like FreeBSD and Linux. While Java and CORBA both run on Linux[5], the underlying operating sy ...

2   **MTEEP: mechanical transmission element expert system** ▪

Sanjiv Ranjan
February 1988 **Proceedings of the 1988 ACM sixteenth annual conference on Computer science**
Publisher: ACM Press
Full text available: 📄 pdf(499.47 KB)   Additional Information: full citation, abstract, index terms

MTEEP (Mechanical Transmission Element Expert) is an expert system for the design of mechanical transmission elements and proper material selection. Much of the research and development in Engineering with respect to expert systems has been confined to Electrical Engineering. Less research has taken place towards the development of an efficient expert system in the field of Mechanical Engineering Design. Many of the problems encountered by mechanical designers are complex and tim ...

1 **Unified versioning through feature logic**   ⬛

Andreas Zeller, Gregor Snelting
October 1997 **ACM Transactions on Software Engineering and Methodology (TOSEM)**,
Volume 6 Issue 4
Publisher: ACM Press

Full text available: 🔲 pdf(699.55 KB)   Additional Information: full citation, abstract, references, citings, index terms, review

Software configuration management (SCM) suffers from tight coupling between SCM version-ing models and the imposed SCM processes. In order to adapt SCM tools to SCM processes, rather than vice versa, we propose a unified versioning model, the version set model. Version sets denote versions, components, and configurations by feature terms, that is, Boolean terms over (feature : value)-attributions. Through feature logic, we ...

Keywords: feature logic, version sets

2 **Performance analysis of a fault tolerant computer system**   ⬛

Lionel C. Mitchell
April 1990 **ACM SIGMETRICS Performance Evaluation Review , Proceedings of the 1990 ACM SIGMETRICS conference on Measurement and modeling of computer systems SIGMETRICS '90**, Volume 18 Issue 1
Publisher: ACM Press
Full text available: 🔲 pdf(222.99 KB)   Additional Information: full citation, abstract, index terms

This paper presents the description of an analytical queueing network model of a Tandem computer system in the FAA Remote Maintenance Monitoring environment and a performance analysis of the Maintenance Processor Subsystem for the 1990s time frame. The approach was to use measurement data to quantify application service demands and performance contributions of the fault-tolerant software in the Tandem environment in an analytical queueing network model. Sensitivity analyses were conducted u ...

3 **Inheritance semantics for computer-aided design databases**   ⬛

Randy H. Katz
September 1986 **Proceedings on the 1986 international workshop on Object-oriented database systems**
Publisher: IEEE Computer Society Press
Full text available: 🔲 pdf(103.58 KB)   Additional Information: full citation, abstract, index terms
